

High Definition Fine Art Aluminum

Fine Art Aluminum photo panels are an exciting new dimensional display/mounting option for images. Produced in a range of popular sizes, featuring an advanced, highly durable and ultra smooth UV resistant coating bonded to .045 aluminum substrate. Unsurpassed image look and feel with a super gloss surface.

Designed to be digitally printed using a sophisticated transfer printing process, Fine Art Aluminum panels are fabricated into a range of display configurations, common photo sized panels, triptychs, and wall mounted large-format panels and murals. Fine Art Aluminum panels can be joined together to create stunning photo displays. Expect brilliant color reproduction and unsurpassed image clarity. They are also scratch and UV resistant with a long life span.

Like most modern printed images, we suggest you consider display environment. Aluminum panels are designed and intended to be used indoors and displayed like you would other Fine Art reproductions, like a Giclee' Canvas or Fine Art Archival prints.

Care and handling: If for some reason your Fine Art Aluminum print needs cleaning, we suggest you use a new "microfiber" cloth. Cleaning with warm water is best however; you can use a dampened microfiber cloth with 70% rubbing alcohol. Aluminum prints have rounded corners for safe handling. Like other images printed on rigid substrates or framed artwork, proper care and common sense is encouraged when displaying any type of image.
